

Parked domains are domains that you own that do not contain any content. Parked domains do not have any email address or web pages associated with them.

## How to add a Parked Domain in cPanel

1. Login to your cPanel control panel
2. Click on the "Parked Domains" icon

3. fill in the following:
  - Enter the domain you wish to park in the available text field.
  - Click *Add Domain*

To open the parked domain's home directory with the File Manager:

- Click the link under *Document Root* that corresponds to the parked domain you would like to view in the File Manager.

## How to remove Parked Domain in cPanel

To remove an existing parked domain:

- Click the *Remove* link corresponding to the parked domain you would like to remove.
- Confirm that you would like to remove the parked domain by clicking *Yes*.
- To keep the parked domain, click *No*.
